DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Doherty.

Doherty discloses an electrostatically atomizing device comprising a tank 28; capillary carrier 44; first electrode 50; and second electrode 46, except for the cation exchanger. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide an cation exchanger in the apparatus of Doherty in order to remove an impurities before spraying the work piece. The apparatus of Doherty is capable of dispensing water.

Allowable Subject Matter

3. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brown and Coffee show electrostatically atomizing devices with wicks or capillaries.
